

Nero Global helps restoration companies keep full control of dehumidifiers, air movers, scrubbers, and extractors, so nothing gets lost, forgotten, or left behind.

Get Equipment Working, Not Sitting

Maximize utilization across every job. When every asset is visible, every asset can earn you revenue.

- Quickly see where equipment is deployed
- Redeploy assets as jobs dry out and close
- Avoid unnecessary rentals when owned equipment is available

Built for CAT Events and Business Growth

Nero Global scales with you—whether you're handling daily jobs or responding to region-wide disasters.

- Manage multiple locations, crews, and job sites in one system
- Scale up quickly during peak seasons and CAT responses
- Maintain visibility and control even when operations expand overnight

No Manual Scanning. No Missed Equipment.

Your crews don't have time to scan tags or manually log inventory. With automated asset detection:

- Equipment is recognized automatically when vehicles arrive / leave a job site
- Inventory updates happen in the background
- Errors, omissions, and forgotten equipment are minimized

Respond Faster. Recover More. Protect Your Margins

In restoration, speed is everything. Nero Global helps you respond immediately, even during CAT events. Know where your resources are, deploy the closest team, and take control even in the most demanding conditions.

One System for Vehicles, Assets, and Crews

Nero Global brings everything together in one simple platform. Spend less time chasing information, more time running the business.

- Track vehicles, equipment, and crews in real time
- Reduce admin work and eliminate mismatched records
- Save fuel costs and reduce equipment shrinkage

Speed Up Job Close-Outs and Equipment Recovery

Knowing what equipment is on site and how long it's been there helps you:

- Close jobs faster
- Recover assets promptly
- Free equipment for the next emergency call

Support Safer Crews and Reliable Operations

Protect your people, vehicles, and reputation

- Promote safer driving during long shifts and overnight callouts
- Reduce accident risk in high stress response situations
- Receive alerts if vehicles or equipment are misused

Built for Restoration Operations

Designed to fit restoration workflows—not disrupt them.

- Works with your existing vehicles and equipment
- Access fleet and asset data from any device, anywhere
- Integrates with restoration and business management software

Be ready before the next call comes in.
